**Call us today if your needs include:**

**Complete remote computer access**

If you spend time away from the office, complete computer access will give you the power to maximize the productivity of your working hours. InfoTech can set you up to access your office computers from anywhere—giving you the freedom to work remotely as if you were actually there.

**Paperless Office at the click of a mouse**

Make thumbing through towering file drawers a thing of the past. InfoTech's paperless office solution will not only eliminate the chore of filing, but will store all your documents on an electronic system that can be backed up regularly, keeping your important files readily accessible and 100% safe.

**Protection from costly intrusion and damage**

Unsavory characters are working overtime to find new ways to attack your computers and steal your information. InfoTech makes it their business to protect your computers with the most up-to-date anti-intrusion solutions, eliminating the risk of damage and infection by malicious hackers, spyware, worms, and viruses.

**Effective spam solutions**

Downloading spam ties up your computer, and sifting through junk in your inbox takes you away from running your business. InfoTech's spam solutions will eliminate unwanted email from your inbox, ensuring only the mail you want gets through!

**Server solutions for your growing business**

Just because your business has outgrown its network is no reason to slow things down. InfoTech experts will set you up with an easy-to-manage, powerful server with the capacity and flexibility to grow with your business.

**100% secure off-site backup**

Backing up your computer files to a remote site secures your data against the potentially catastrophic results of loss, theft, and damage. InfoTech gives you the peace of mind that comes from knowing your files are 100% safe—no matter what.

**Effective email solutions**

Unless you've had far too much time on your hands, chances are you aren't making the most of your email program. InfoTech can set up your email program for optimum impact, efficiency, and productivity, at your home and office.

**Computer training for maximum productivity**

Our computer training experts can train you to get the most out of your computer software and hardware investment on a daily basis. InfoTech's customized packages are available for everything from office applications to system administration, from beginner to advanced levels.
